

# ENGINEERING & CONSTRUCTION RISK INSTITUTE

Document number: <b>ECRI-JV-002 (DESC)</b>	<b>Joint Venture Benefit and Gap Analysis</b>	Page: 1 of 2
Revised: 1 September 2009		

**Purpose:** The purpose of this document is to provide a best practice in Joint Venture formation with the development of an assessment of the benefits a partner can expect to obtain through participation in the Joint Venture, along with the difficulties and gaps in the capabilities of the companies that must be addressed.

**Application:** The document is prepared as part of the firm's decision to participate in the Joint Venture. The completed analysis becomes input material for both the Joint Venture Agreement and the combined Project Execution Plan. During project execution it serves as a reference point for the JV participant to consider whether the decision to participate was valid.
