Document number: <b>ECRI-PE-007 (DESC)</b>	<b>Supply Chain Management / Material Control</b>	Page: 1 of 1
Issued 25 May 2011		

## Supply Chain Management / Material Control

**Purpose:** The purpose of this document is to provide an overview on the risks and lessons learned associated with the subject of Supply Management, Logistics and Material Control during project execution.

**Introduction:** Managing the E&C Project supply chain and controlling materials provides the E&C Contractor with many challenges and risks during project execution. This is a complex subject ranging from Supplier qualification through to site delivery, along with the control and timely availability of equipment and materials. Poor management of this aspect of the project will inevitably lead to a poor project outcome. A key issue towards a successful outcome will be the building up of relationships and constant liaison with ones Suppliers along with an ethical approach to procurement.
