

# ENGINEERING & CONSTRUCTION RISK INSTITUTE

Document number: <b>ECRI-PE-010 (DESC)</b>	<b>Key Performance Indicators for Forecasting and Optimizing Project Outcomes</b>	Page: 1 of 1
Issued: 18 April 2012		

**Purpose:** This document discusses the use of Key Performance Indicators for risk mitigation, forecasting and optimizing project outcome.

**Introduction:** The success of an engineering and construction project is highly dependent on the quality of the managerial, financial, technical and organizational performance of an E&C organization. Critical Success Factors and Key Performance Indicators can be used to predict project outcome. These performance measurements are now an important aspect of executing and controlling projects. Key Performance Indicators provide the Organization of how well they are performing in relation to their strategic goals and objectives.
