

ENGINEERING & CONSTRUCTION RISK INSTITUTE

Document number: ECRI-RM-009 (DESC)	Risk Management Tools & Project Management Control Software	Page 1 of 1
Issued:- 30 May 2013		

Purpose:- To provide ECRI members with a list of commercially available Risk Management software, and commercially available Project Management Control software as well as a summary of the capabilities and features of such, for assessing and managing risk at the Corporate and Operational level.

Introduction:- Most Engineering and Construction Contractors use risk management tools and project management control tools in the day to day management of their company and project operations. They are sometimes developed internally but are often also purchased from companies that specialise in the development of Risk Management and Project Control software as these products become more sophisticated and better equipped to address the complex needs of leading Engineering and Construction Contractors.

The purpose of this document is to facilitate ECRI member evaluation and tool selection of currently available Risk Management and Project Management Control Tool software relative to its corporate and operational needs

ECRI Description file – The complete version if this document is located in the Sponsors Resources area of this website and requires a Sponsors Login to access.
